

SKILLS

- **Languages:** Python, TypeScript, JavaScript, C/C++, SQL
- **Frontend:** Next.js, React.js, Tailwind CSS, Three.js
- **Backend & AI:** Node.js, REST APIs, Serverless Architecture, Multi-Model Agents, Background Workers, Automated Invoicing
- **Databases & DevOps:** PostgreSQL, Prisma, Docker, Git, GitHub Actions, Vercel, Data Migration, QA Testing

WORK EXPERIENCE

AI Engineer <i>Gyannetra Pvt Ltd</i> – Engineered serverless AI architectures integrating LLMs, reducing inference latency by 30% and eliminating idle server costs. – Architected autonomous multi-model agent workflows using Python and REST APIs, managed via Docker CI/CD pipelines to ensure 99.9% uptime.	May 2026 – Present <i>Remote</i>
Frontend Developer <i>Gyannetra Pvt Ltd</i> – Migrated legacy architecture to Next.js with Server-Side Rendering (SSR), decreasing First Contentful Paint (FCP) by 40%. – Integrated Node.js REST APIs with frontend state management to process real-time data synchronization. – Containerized application environments via Docker to standardize local and production builds.	Sep 2025 – May 2026 <i>Hybrid</i>
Research Intern (Deep Learning) <i>DRDO</i> – Trained and evaluated deep learning models on structured research datasets within the AI/ML department. – Engineered data preprocessing pipelines in Python, increasing model training efficiency and data throughput by 25%. – Collaborated with research scientists to implement structured evaluation metrics for model reliability.	July 2025 – Sep 2025 <i>Jodhpur, India</i>
AI Intern – Web Development <i>Gyannetra Pvt Ltd</i> – Developed modular React components and connected them to backend AI services via RESTful API layers. – Reduced local setup inconsistencies by 50% through Docker containerization.	May 2025 – July 2025 <i>Hybrid</i>

PROJECTS

Enterprise LMS & CRM System – Architected full-stack Learning Management System and CRM to manage authentication, course entitlements, and automated invoicing for 525+ active users. – Engineered a custom Python migration pipeline to transition 91+ legacy WooCommerce enrollments to a relational PostgreSQL schema, utilizing UUIDs to enforce 100% unique data integrity. – Containerized API, database, and background task workers using Docker to automate payment state management and zero-touch PDF invoice generation.	Live Demo
Gyannetra AI Consultancy Platform – Built a production-ready Next.js platform deployed on serverless architecture (Vercel) to handle scaling traffic with sub-second edge routing. – Optimized React rendering cycles and asset delivery to achieve 90+ Lighthouse Core Web Vitals scores. – Integrated automated QA testing protocols and dynamic content management APIs to synchronize real-time consultancy data across client interfaces.	Live Demo
Full-Stack Developer Portfolio – Developed Next.js App Router architecture utilizing Server Components and dynamic imports to reduce JS bundle size by 35%. – Configured DNS routing, dynamic repository sitemaps via Google Search Console, and automated CI/CD deployments. – Engineered a serverless backend to integrate two distinct AI models, delivering real-time, interactive multi-agent experiences directly to end users without dedicated provisioning.	Live Demo

EDUCATION

Jodhpur Institute of Engineering and Technology (JIET) <i>B.Tech in Computer Science Engineering (CSE)</i>	2027 <i>Jodhpur, Rajasthan</i>
Central Academy School <i>Senior Secondary Education (75%)</i>	2023 <i>Jodhpur, Rajasthan</i>

ACHIEVEMENTS

- Secured Thematic Award (FinTech Revolution) at global IDEATHON 2025 (FIU) for architecting a scalable financial tool.
- Ranked in Top 20% (5,000/25,000 teams) in the national 'Build with India' hackathon.
- Placed Top 30 among 180+ teams at Web-A-Thon MNIT Jaipur utilizing full-stack development.
